

Technical cross-section diagram of a road pavement structure. The diagram shows a central concrete slab (A.Σ.Υ.=64.06) with a width of 0.30m, surrounded by a 0.40m thick layer of bedding material (Εξομαλυντική στρώση C12/15). The entire structure is covered by a 3cm thick concrete layer (Τσιμεντοκονία πάχους 3 cm) and a double asphalt layer (Διπλή ασφαπτική επάλειψη). The diagram is divided into sections with widths of 15, 10, 4.7, 2.12, 0.00, 2.20, 5.00, 6.00, 10.00, and 15.00. The corresponding elevations are 66.10, 65.97, 65.79, 65.87, 65.68, 65.61, 65.79, 65.79, 65.64, and 65.79.
